SUMMARY

Frontend Engineer with +4 years of professional experience building scalable, high-performance web applications, primarily in the **Vue/Nuxt** ecosystem. Currently expanding into **React** and **Next.js** through hands-on project work, applying the same core frontend architecture principles to deliver modern, production-ready experiences. Available for **Vue**, **React**, or hybrid frontend roles — comfortable moving fast across frameworks.

WORK EXPERIENCE

Frontend Engineer, Tabdeal

May 2025 – March 2026

- Contributed to the migration of a large-scale cryptocurrency trading platform from Nuxt 2 to Nuxt 3, improving maintainability and reducing bundle size.
- Collaborated within a 12-member frontend team, participating in code reviews and maintaining high engineering standards.
- Improved SSR and hydration performance to enhance application speed and user experience.
- Implemented SEO enhancements, metadata management, and reCAPTCHA integration.
- Worked with Git Flow and CI/CD pipelines to support efficient deployment processes.

Frontend Developer, Ayan (Ghabzino)

2022 – 2025

- Developed and maintained enterprise administrative applications using Vue 3.
- Designed and implemented a reusable Design System that standardized UI components across multiple internal projects.
- Collaborated with backend developers to improve API integration and application architecture.
- Developed citizen service modules for the Ewano (MCI) project.
- Contributed to the Pishkhan24 platform using Vue Composition API.
- Integrated RESTful APIs across multiple production applications.

Internship, Novaday

June 2022 – Oct 2022

- Developed responsive bilingual web applications using Vue.js.
- Worked with Vuex, Pinia, and Vue Router to manage state and implement dynamic, modular navigation.

PROJECTS

Personal Portfolio (Next.js)

Present

- Designed and developed a personal portfolio using Next.js App Router, TypeScript, and Tailwind CSS.
- Created reusable UI components with light and dark mode support
- Deployed on **Vercel**.

Ghabzino Counter Panel (Vue.js)

- Built an administrative web application that simplifies inquiry and payment processes by allowing users to manage multiple fines and bills in one place.

Mini Mench (JavaScript • HTML • Sass)

- Built a fully responsive landing page for a visually complex game
- Overcoming significant cross-device layout challenges to achieve pixel-perfect consistency on desktop, tablet, and mobile.

SKILLS

- | | | | | |
|---------------------|---------|------------------------|-----------------|-------------------------|
| • JavaScript (ES6+) | • Vue | • Next.js (App Router) | • SSR, SSG, SWR | • Tailwind CSS |
| • HTML5 | • Nuxt | • TypeScript | • Rest API | • Sass |
| • CSS3 | • Pinia | | • Vite | • Responsive Web Design |
| | | | • Webpack | |
| | | | • Git Flow | |
